

This is the overhead of the area.

Pad was created to ensure pool stability. Photo is laid out with North being at the top of the page. Dock would be placed to north of pool with bleachers set to the East. I have additional bleachers if layout allows it. I was thinking it would be easier to run an kennelling along the fence behind the dock.

Parking.

I have some spots held in the back of the lot across the street we normally utilize for paid parking and some food vendor food storage. There is a gate onto property right next to your location so competitors would enter there. I will need to know parking counts to make certain I have space. I can also provide names and info to the ticket booth there to make certain it runs as smooth as possible.
